# Using your caddy to recycle.

1

After preparing a drink, remove pod from machine with pod tray and leave to cool and drain.

2

Once you have allowed some time for drainage, move used pods to your caddy to store between collections.

3

Pods will drain further in the caddy. Drain the caddy of any liquid and residue.

4

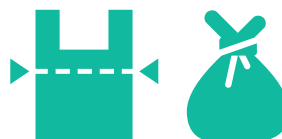

You have been provided with a supply of kerbside recycling bags for placing your pods in.

5

Before collection, transfer drained pods from the caddy to the kerbside recycling bag.

6

Do not fill the bag above the dotted line and tie the kerbside recycling bag securely.

7

Place your bag out for recycling. Check your local authority website for collection days.

8

Clean out your caddy to be ready to use again.
